

HOW PINJA TOOK CONTROL OF THEIR MULTI-CLOUD JOURNEY

Pinja hosts a wide range of SaaS solutions in a private cloud. And as a part of their professional services portfolio, **Pinja offers private cloud solutions** to their clients

In the past, the management of their many clouds was done with individual point solutions, and Pinja lacked an overall visibility of their multi-cloud.

Then they started using the **Ficolo Cloud Management Platform**. Now everything they need to manage and lead their multi-cloud resources can be done in a single platform.

Check also pinja.com for more information about their services

FICOLO CLOUD MANAGEMENT PLATFORM

DEVELOPMENT

PUBLIC AND PRIVATE CLOUDS

OPERATIONS

Many organizations are struggling to cope with the chaos of managing the multi-cloud. Ficolo Cloud Management Platform empowers you to take control.

- **Manage all your clouds** with a single platform
- **Implement governance** across the multi-cloud
- **Optimize the use and costs** of the entire multi-cloud
